02 / 08 • THE PROBLEM

Traditional learning cannot keep up with individual gaps.

Classrooms are overloaded, tutoring is expensive, and generic AI tools rarely explain what a learner truly needs next.

102K+ teacher shortage across Vietnam
Vietnamnet, 2025

23:1 vs. 15:1 student-teacher ratio compared with OECD benchmark
Statista, 2024

01

One-size-fits-all

Students fall behind or disengage when pacing and content are not personalized.

02

1:1 support does not scale

Tutoring costs 200K-500K VND/hour, widening the gap for learners who need help most.

03

AI wrapper risk

Generic chatbots do not expose weaknesses, evidence, or a reliable remediation trail.

68%
OUTPERFORMANCE

THE EVIDENCE IS CLEAR

Active learners **outperformed 68%** of lecture students on tests — yet felt they learned less, proving the *"illusion of learning"* from lectures.

Deslauriers et al.

PNAS, 2019

Harvard • Randomized experiment • 149 students

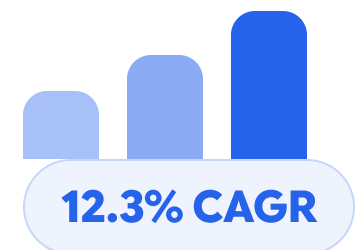

A fast-growing market still lacks true adaptive depth.

The opportunity is not another content library. It is a learning engine that understands each knowledge point.

Vietnam EdTech

IMARC Group, 2025

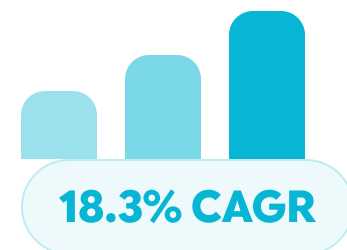

\$1.1B
to \$3.2B

Vietnam E-learning

P&S Research Market, 2025

\$3.9B
to \$12.6B

Global Adaptive Learning

MORDOR Intelligence, 2025

\$5.1B
to \$12.7B

The gap: growth is strong, but few platforms adapt at the knowledge-point level.

VinLearn turns learning signals into the next best lesson.

Product surfaces stay simple; the adaptive engine does the heavy lifting.

CORE CAPABILITIES

- 01

Placement
Routes each learner into skip, review, or relearn.
- 02

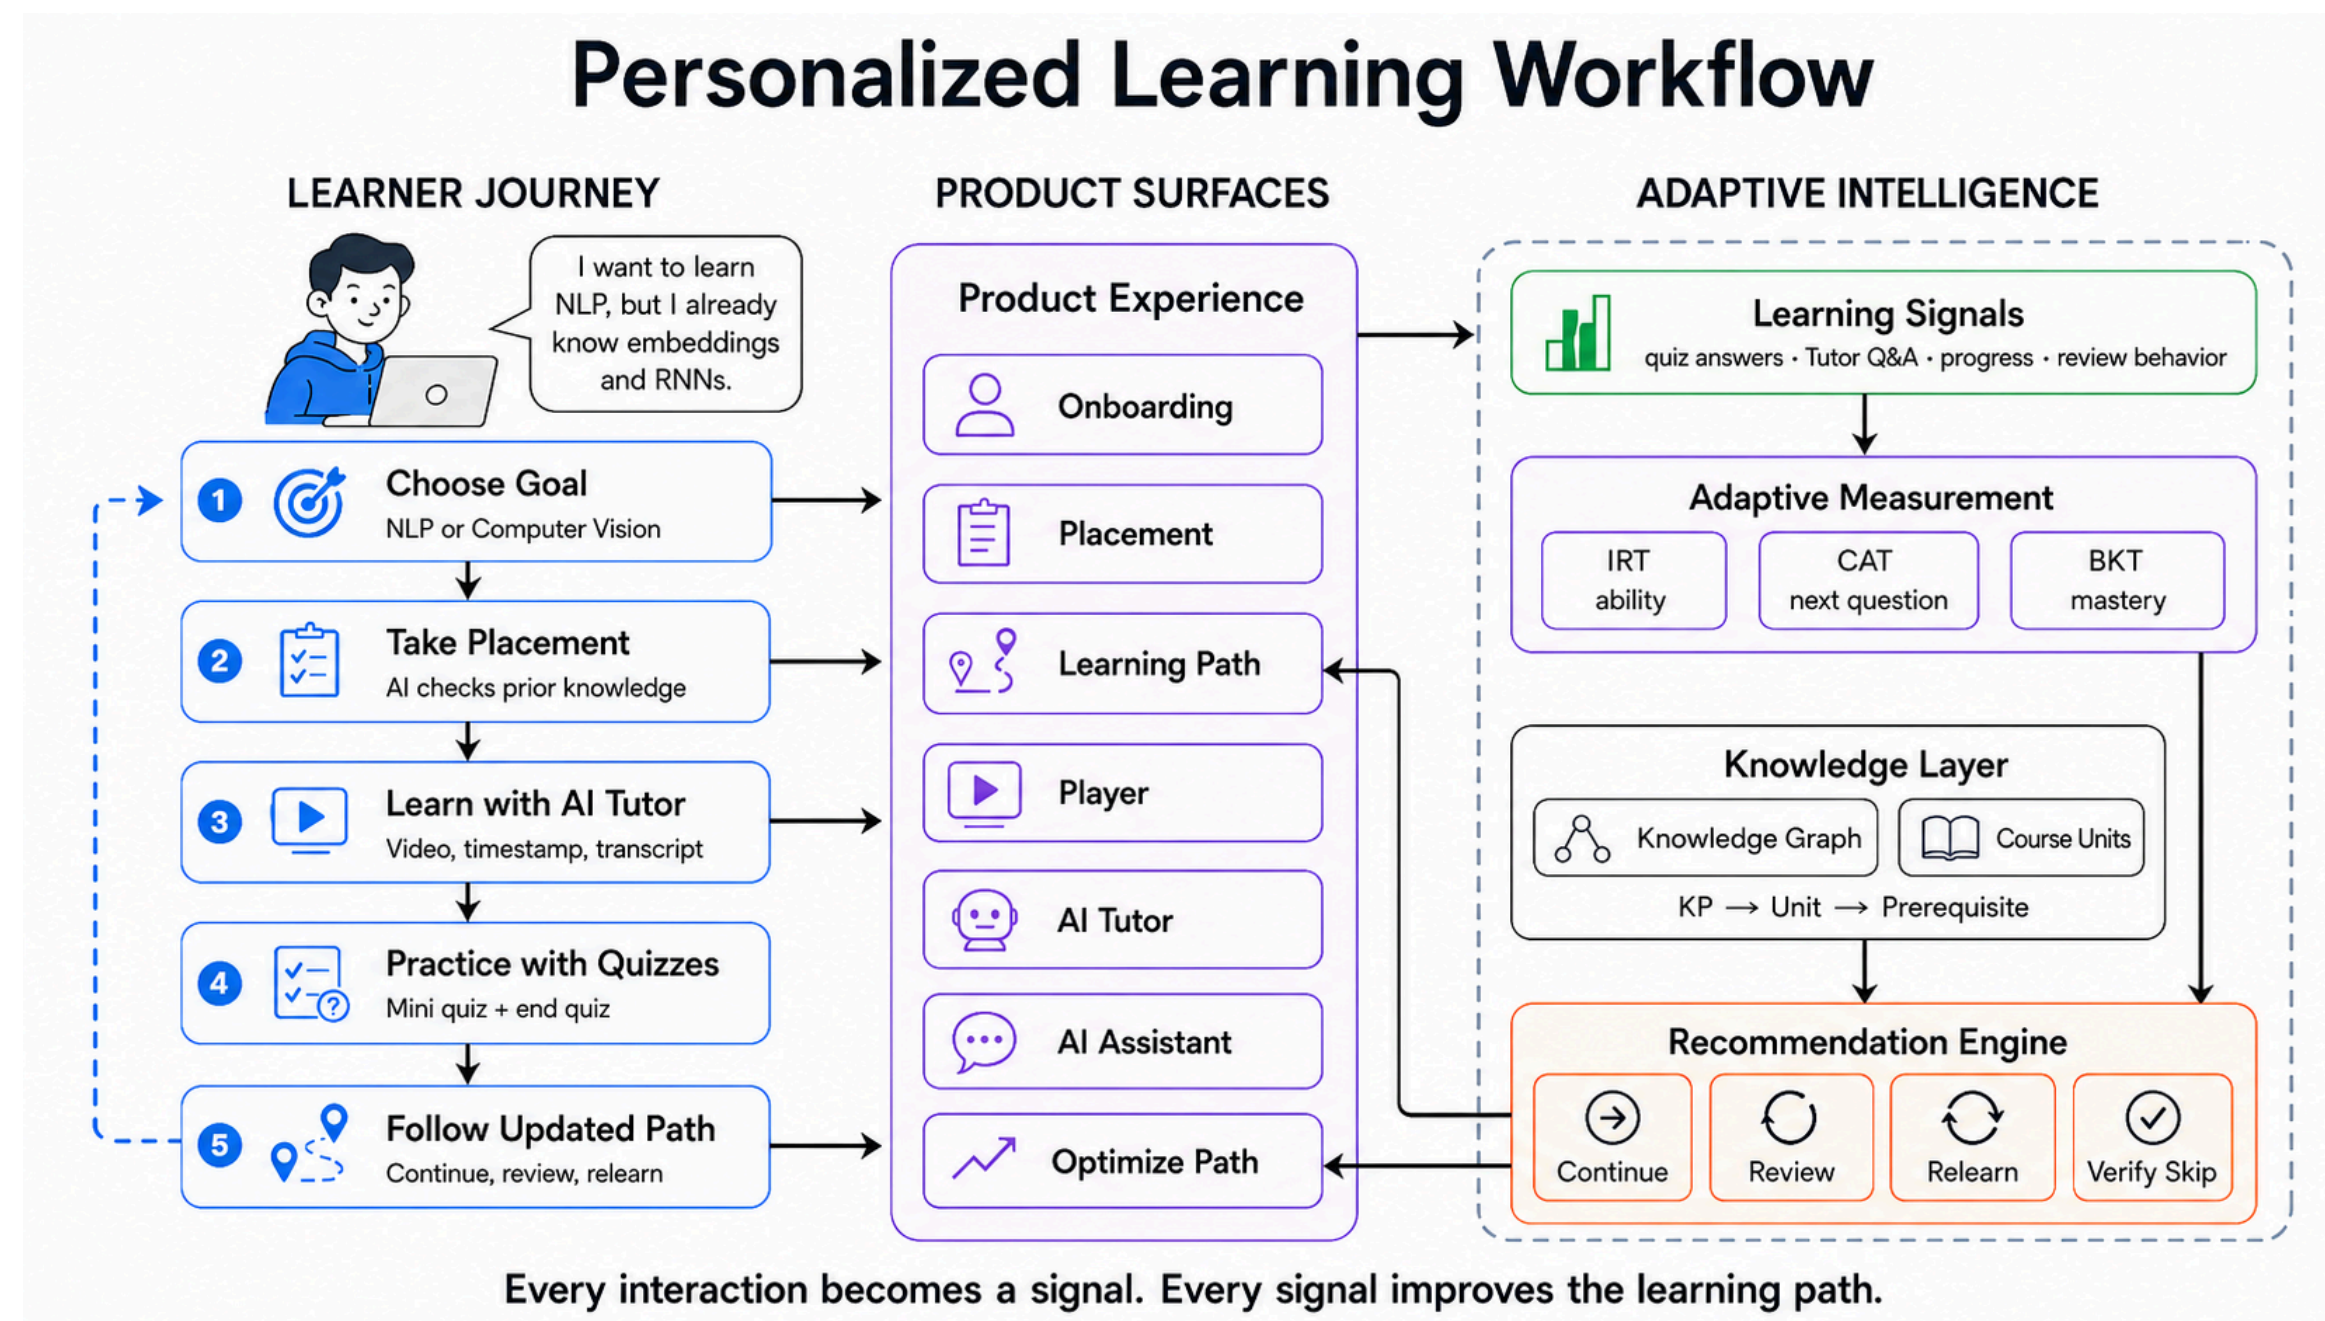

Knowledge Points
Breaks course material into prerequisite-aware units.
- 03

Mastery Tracking
Scores confidence before the learner moves forward.
- 04

AI Tutor
Explains, hints, and deep-dives from source material.

Learner journey connected to adaptive intelligence.

Three revenue streams balance scale, access, and enterprise value.

Start with school licensing, expand through premium learners, then package the mastery engine for corporate learning.

B2B2C

School License

Customers: VinSchool, universities, high schools

150K-300K VND / user / month

Large volume

B2C

Premium Users

Customers: Individual learners on freemium upgrading for AI Tutor access

199K VND / month

Mass market

B2B

Corporate L&D

Customers: Organizations such as FPT or MoMo

5-15M VND / seat / year

High value

Why we win in the Vietnamese market.

	Khanmigo	Squirrel AI	Duolingo Max	Coursera Coach	VinLearn 
Mastery Tracking	 Course-level	 KP-level	 Lesson-level	 None	 KP-level (IRT+BKT)
AI Tutor	 Socratic wrapper	 Rule-based	 GPT-4 wrapper	 Q&A chatbot	 Agentic + HITL
Audit Trail		 Partial			 Full
Domain	 Math, Science	 Traditional K-12	 Language only	 Broad (3rd-party)	 Domain-agnostic (Scalable)
Price	\$8/mo	\$14–28/hr	\$14/mo	\$59/mo	\$8/mo
VN Market	 Not entered	 CN/US only	 Language only	 Not localized	 Localized

08 / 08 • THE ASK

We're not raising capital — we're seeking partnership.

Mentor & Advisory

Education experts, curriculum design, and question bank evaluation.

GPU & Infrastructure

Support for training, fine-tuning, and running our custom LLMs.

Resources & Network

Pilot school connections, content experts, and distribution channels.

**With VinUni's reputation and the right partners,
we believe this project can go much further.**
